

Krishnamurthi

Aspiring Product Manager — AI & Technology Products

kiccha1703@gmail.com | github.com/krishnamurthi-ramesh

linkedin.com/in/krishnamurthi-ramesh | +91-90037-62619

Profile

Engineering graduate (IIITDM Kurnool) and PGPMCI candidate at IIM Visakhapatnam bridging deep technical fluency in AI/ML systems with product and business fundamentals. Built and shipped AI-driven features end-to-end (data → model → API → measurable business outcome) across two internships, and led an independent research project on AI system reliability. Seeking an Associate Product Manager or Consulting role where technical depth in AI/ML translates directly into sharper product and strategic decisions.

Education

Indian Institute of Management Visakhapatnam <i>Post-Graduate Program in Management for the Centrally Funded Technical Institutions (PGPMCI)</i>	2025 – 2027
IIITDM Kurnool <i>B.Tech, Computer Science and Engineering</i>	2022 – 2026

Experience

Data Science Intern — Meraqui Ventures Pvt. Ltd. (karam.ai) <i>Pune, India</i>	Apr 2025 – Jul 2025
--	---------------------

- Owned the requirements-to-shipping loop for an AI-driven candidate-matching feature: partnered with stakeholders to define success metrics, then improved matching precision by **15%** through feature engineering and LLM fine-tuning.
- Drove integration of the AI platform with client ERP systems via REST APIs, cutting manual data entry by **15%** and directly improving customer-facing workflow adoption.
- Reduced downstream data inconsistencies by **12–15%** by specifying and building schema-validated ETL pipelines, improving trust in product-facing outputs.
- Defined and executed test suites and API contracts with engineering to de-risk production AI deployments.

Development Engineering Intern — Treacle Technologies (Incubated at IIT Kanpur) <i>Kanpur, India</i>	Jun 2024 – Aug 2024
--	---------------------

- Specified and built monitoring dashboards (Grafana, Elasticsearch) that cut incident detection time by **40%**, translating an operational pain point into a measurable reliability metric.
- Scaled real-time data pipelines to process **100k+ logs/day** with custom evaluation metrics informing system health.
- Automated preprocessing workflows across distributed systems, removing **80%** of manual operational effort.

Independent Research — Product-Relevant AI Systems Work

Reliability Framework for Quantized Vision-Language Models	2026
- Identified a real-world product risk — hallucination in cost-optimized (quantized) AI models deployed on edge/on-device hardware — and scoped an original technical solution to address it. - Designed a non-parametric density-drift detector and a cost-aware two-tier inference cascade (GPU + CPU), directly trading off latency, cost, and reliability — the same trade-off triangle product teams navigate when shipping AI features. - Iterated the work through external peer review, incorporating critical feedback into a revised technical framework, ahead of submission to an IEEE journal.	

Enterprise RAG System with Comprehensive Evaluation	Feb 2025
Built and evaluated a production-grade RAG pipeline (LangChain, FAISS, Ollama), defining a rigorous evaluation rubric (Ragas, Recall@K, NDCG, Precision, latency) to quantify output quality before shipping.	

Business & Management Coursework

- CRM & Case Analysis** — Presented strategic case analyses (HBS “Done Right.” case; Pepperfry case) on customer relationship and channel strategy.
- Coursework: Advanced Analytics, Platform & Ecosystem Strategy, Automation for Managers, Project Management, International Business, Entrepreneurial Finance.

Skills

Product: Roadmapping, PRDs, Prioritization Frameworks, A/B Testing Fundamentals, Stakeholder Management

Data & Evaluation: SQL, Recall@K, NDCG, Precision, Latency Benchmarking, Ragas

Technical Fluency: Python, REST APIs, FastAPI, Docker, PostgreSQL, LLMs, RAG, LangChain, FAISS

Certifications & Achievements

- Oracle Cloud Infrastructure 2024 Generative AI Certified — Score: 92.5%
- 2nd, GDG Hackathon (AI/ML) — Mar 2025 | 2nd, DataWorks Hackathon (LLM Apps) — Apr 2025
