Profile

Engineering graduate (IIITDM) and PGPMCI candidate (IIMV) with experience shipping AI/ML features from requirements through production. At Meraqui, collaborated with stakeholders and engineering on AI candidate matching and success metrics. Complemented by self-initiated product teardowns (Comet, KreditBee, PhonePe) and an interactive PM Decision Simulator, focusing on funnel friction, trade-offs, and validation metrics.

Education

Indian Institute of Management Visakhapatnam 2025 – 2027
Post-Graduate Program in Management (PGPMCI)

IIITDM Kurnool 2022 – 2026
B.Tech, Computer Science and Engineering

Experience

Data Science Intern — Meraqui Ventures Pvt. Ltd. (karam.ai) Apr 2025 – Jul 2025
Pune, India

- Owned the requirements-to-shipping loop for an AI-driven candidate-matching feature, partnering with stakeholders to define success metrics and improving matching precision by **15%** through feature engineering and LLM fine-tuning.
- Drove integration of the AI platform with client ERP systems via REST APIs, cutting manual data entry by **15%** and improving customer-facing workflow adoption.
- Reduced downstream data inconsistencies by **12–15%** by specifying and building schema-validated ETL pipelines, improving trust in product-facing outputs.
- Defined and executed test suites and API contracts with engineering to de-risk production AI deployments.

Development Engineering Intern — Treacle Technologies (Incubated at IIT Kanpur) Jun 2024 – Aug 2024
Kanpur, India

- Specified and built monitoring dashboards (Grafana, Elasticsearch) that cut incident detection time by **40%**, translating an operational pain point into a measurable reliability metric.
- Scaled real-time data pipelines to process **100k+ logs/day**, automating preprocessing across distributed systems to remove **80%** of manual operational effort.

Product Case Studies — Self-Initiated Teardowns

Comet (E-commerce AI Search) — Teardown & Friction Analysis 2026

- Reverse-engineered Comet's AI "Finder" discovery flow to diagnose drop-off friction between recommendation generation and PDP conversion.
- Proposed a context-aware conversational memory solution to carry size/fit parameters across sessions to reduce cart abandonment, defining "Finder-assisted add-to-cart rate" as the validation metric.

KreditBee & PhonePe Lending — Same Category, Two Failure Modes 2026

- Diagnosed structurally distinct friction points across two live lending funnels: a document-upload bottleneck (KreditBee) versus a marketplace trust-continuity break (PhonePe).
- Proposed conversational AI-agent solutions — real-time document feedback and cross-partner context carry-over — each paired with primary/secondary validation metrics (e.g., first-session KYC completion rate).

Independent Research — Product-Relevant AI Systems Work

Reliability Framework for Quantized Vision-Language Models 2026

- Identified a real-world product risk — hallucination in cost-optimized (quantized) AI models deployed on edge/on-device hardware — and scoped an original technical solution to address it.
- Designed a non-parametric density-drift detector and a cost-aware two-tier inference cascade (GPU + CPU), directly trading off latency, cost, and reliability — the same trade-off triangle product teams navigate when shipping AI features.
- Iterated the work through external peer review, incorporating critical feedback into a revised technical framework, ahead of submission to an IEEE journal.

Product & Technical Skills

Product: Problem Framing, Product Discovery, Success Metrics, Funnel & Friction Analysis, Prioritization, PRDs, Experimentation Fundamentals, Stakeholder Management
AI/LLM: Prompt Design & Evaluation, RAG, Model Selection, Cost / Latency / Accuracy Trade-offs, Hallucination & Reliability Assessment
Data: SQL, Precision, Recall@K, NDCG, Latency Benchmarking, Ragas
Technical: Figma, Python, REST APIs, FastAPI, Docker, PostgreSQL, LLMs, LangChain, FAISS

Business & Management Coursework

Advanced Analytics, Platform & Ecosystem Strategy, Automation for Managers, Project Management, International Business, Entrepreneurial Finance.

Certifications & Achievements

- Oracle Cloud Infrastructure 2024 Generative AI Certified — Score: 92.5%
- 2nd, GDG Hackathon (AI/ML) — Mar 2025 | 2nd, DataWorks Hackathon (LLM Apps) — Apr 2025
- Research Internship: Nyaya Shastra for Computer Science Engineers (IIITDM Kurnool) · Certificate Attached (Page 2)

भारतीय सूचना प्रौद्योगिकी अभिकल्पना एवं विनिर्माण संस्थान कर्नूल
INDIAN INSTITUTE OF INFORMATION TECHNOLOGY DESIGN AND MANUFACTURING KURNOOL
(An Institute of National Importance under the Ministry of Education, Govt. of India)
Jagannathagattu, Dinnedevarapadu, Kurnool-518008, Andhra Pradesh, India

INTERNSHIP COMPLETION CERTIFICATE

This is to certify that **R Krishnamurthi**, **122CS0067** of the **Computer Science and Engineering (CSE)** department in **IIITDM KURNOOL**, has successfully completed an internship at **IIITDM Kurnool** on the Research project titled:" **Nyaya Shastra for Computer Science Engineers".**

The internship was carried out over a period of **Seven months**, from **01-01-2026 to 31-07-2026**. During this time, the intern demonstrated a strong commitment to learning and made meaningful contributions to the project's objectives.

In this experimental project, the analysis and research on the the applicability of Nyaya Shaastras for Computer science and engineering concepts were carried out. He showed enthusiasm, technical proficiency, and a collaborative spirit throughout the duration of the internship.

We appreciate the dedication and effort put forth and wish **Krishnamurthi** continued success in all future endeavors.

Best regards,

Dr. K. E. Srinivasa Desikan
Assistant Professor
IIITDM Kurnool

Dr. K.E. SRINIVASA DESIKAN
Assistant Professor
Department of Computer Science & Engineering
IIITDM KURNOOL-518008.
